WE CARE

# The aesthetics of Italian design.

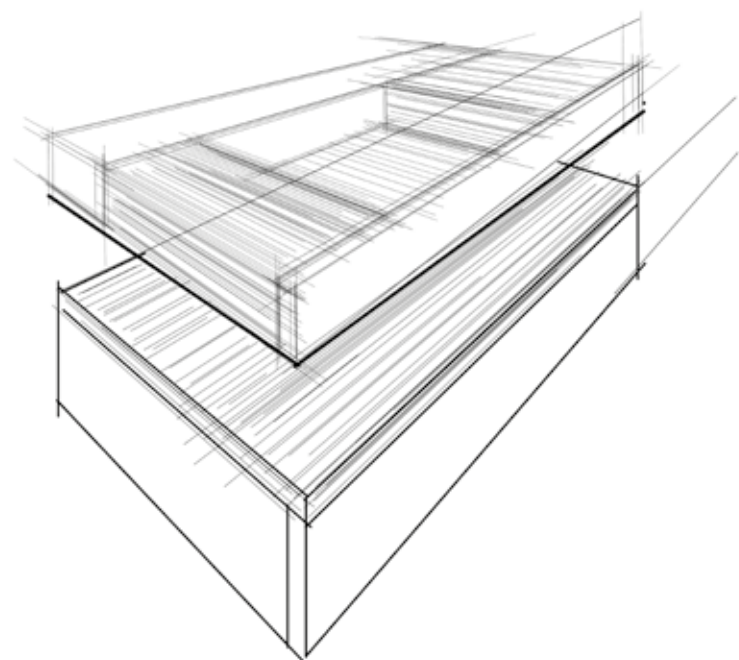

In cooperation with Mario Ferrarini, we present Dialogo, a collection of sinks and matching furniture that enhance the exceptional qualities of porcelain tiles and amplify the aesthetic and design appeal of bathroom furniture. Sophisticated and trendy Italian design creations.

© Ceramiche Atlas Concorde

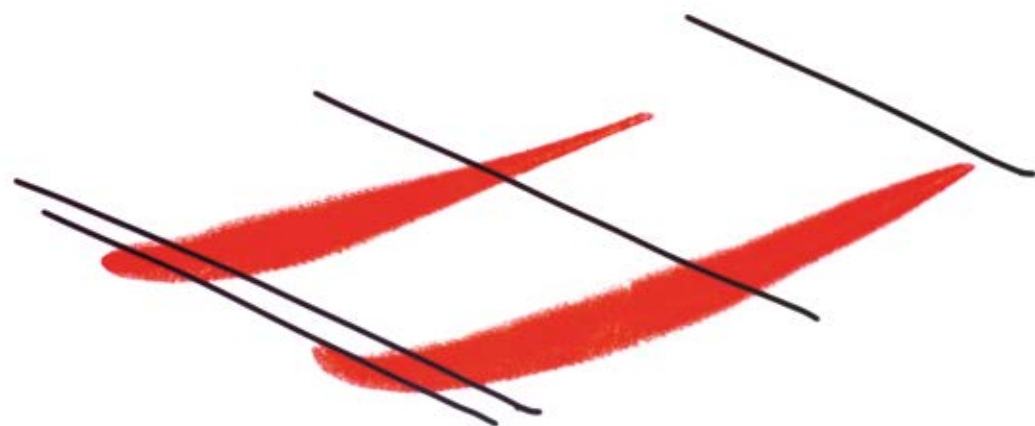

# Dialogo: an exclusive bathroom furniture proposal.

Everything takes shape from a blank sheet of paper, where the designer has traced some marks to imagine a new dimension of bathroom furniture. Dialogo originates from these simple gestures and expresses itself with an elegant and measured language, in a perfect balance of thicknesses, sections, volumes and material suggestions, to celebrate the bathroom. All this results in an exclusive design proposal that suggests carefully studied combinations of sinks, coordinated furniture and floor and wall tile collections to create settings that combine a refined aesthetic taste with the exceptional technical performance of porcelain tiles.

# Attention to detail.

Mario Ferrarini works alongside international companies on various projects ranging from industrial products, furniture and interior design. "We create timeless products that go beyond passing trends. Our aim is to find lasting solutions for our customers with production aimed at the

Mario Ferrarini - Studio Milano

# Elements designed down to the last detail.

With matching sinks and furniture, Dialogo offers two types of elements designed down to the smallest detail to establish a new and advanced combination of design refinement and design functionality. Proposals with a high aesthetic value and at the same time guaranteeing excellent performance.

# Porcelain tile values: aesthetics, resistance and hygiene.

In all the sink elements of the Dialogo line, the availability of the accessible basin makes it possible to combine aesthetics with ease of cleaning. Hygienic and extremely hard-wearing, the basins focus on the unrivalled qualities of porcelain to give resistance and durability to bathroom furnishings.

# Technical features

Quality processes and technologies

**Quality processes and technologies:** the use of the most advanced manufacturing techniques, the best materials and stringent quality testing protocols allow the products to achieve very high aesthetic and functional performance.

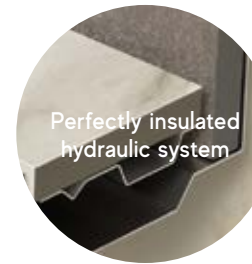

Drain access

**Drain access:** rotating the swinging panel makes it possible to access the basin, allowing any remaining dirt to be easily removed.

Vein continuity

**Continuous vein:** the study of cuts and projections, as well as the use of state-of-the-art technology, makes it possible to develop and maintain vein continuity.

Perfectly insulated hydraulic system

**Perfectly insulated hydraulic system:** the one-piece stainless steel basin prevents water infiltration and ensures perfect hydraulic insulation of the object over time.

High impact resistance

**High impact resistance:** the composite structure has been designed and tested to ensure high impact resistance.

Great stability

**Great stability:** the fixing system consisting of specially designed metal brackets ensures high stability and structural sturdiness.

# Cleaning and maintenance

## SANITIZING

Porcelain tiles surfaces are extremely easy to sanitize, owing to the physical and mechanical features of this material. Indeed, since they are produced at extremely high temperatures, they prove entirely poreless, which prevents mold, mildew and bacteria from spreading. This means sanitizing products or products with a specific concentration of chemicals capable of eradicating germs and bacteria from surfaces can easily be used, for optimum efficiency and without worrying about damaging the material itself.

## ROUTINE CLEANING

For routine cleaning, simply use a damp sponge or a microfiber cloth with hot water and ordinary neutral detergent\* then wipe dry with a soft cloth. To remove dirt built up in the corners, we recommend you rub with a nonabrasive soft bristle brush. Avoid using:

1. Products with waxing, restoring, polishing, brightening properties;
2. Products containing hydrofluoric acid and its derivatives;
3. Metal wire pads (iron and steel pads) or excessively abrasive pads.

**CAUTION: Porcelain tiles do not require the application of waxes or detergents with polishing additives, even when the surface is glossy/lapped.**

\*such as **Clean Universal** made by **Faber Chimica** or **Fila Clean & Shine** for the Italian market - **Fila Cleanall** for the **US** market - **Fila Brio for all other markets**.

## EXTRAORDINARY CLEANING

In the event of tough stains, which cannot be removed during routine cleaning operations, we suggest the use of alkaline detergents\* for coffee, fruit juice, wine, ink stains and the like, acidic detergents\*\* in the event of limescale residue (or rust), use specific detergents to remove silicone sealant residue\*\*\*

\*such as **Clean Degreaser - Deep Degreaser** made by **Faber Chimica** or **Fila Powerclean** for the Italian market - **Fila Hobby** for other markets.

\*\*such as **Clean Limescale - Tile Cleaner** made by **Faber Chimica** or **Fila Deepclean** for the Italian market - **Fila Via Bagno** for other markets.

\*\*\*such as **Epoxy Cleaner** made by **Faber Chimica** or **Fila Zerosil**.

## STEEL SURFACES

Stainless steel is an extremely strong material and is not subject to the corrosive action of oxidation. However, specific products should be used for cleaning it.

In addition, to avoid damaging the surface, do not use:

1. sponges or scourers that could cause irreversible scratches and abrasions;
2. aggressive chemicals;
3. cleaning products based on ammonia, bleach or chlorine.

## LACQUERED SURFACES

Daily cleaning and maintenance of the lacquered surfaces of the drawer unit. To maintain lacquered surfaces for as long as possible and in the best possible condition, proceed as follows:

1. Treat the stain promptly, allowing it to remain in contact with the surface for as little time as possible.
2. Only use a moistened microfibre cloth, white if possible. Do not use sponges or rags that could scratch the surface.
3. Use a NON-abrasive, neutral liquid soap solution. Marseille soap is particularly suitable. Simply dilute a few flakes in a bowl with lukewarm water, lightly dampen the cloth and wipe the surface.
4. After wiping, it is best to rinse and dry quickly, taking care to use a dry cloth different from the one used for cleaning. Air drying is not recommended because halos or traces of water may remain.
5. Do not use organic solvents such as acetone and alcohol, do not use detergents containing strong acids, kitchen detergents and substances containing ammonia, trichloroethylene and bleach.

## MADE IN ITALY

The Made in Italy logo stands for style, quality and ethics. Having firmly adhered to the Ethical Code promoted by Confindustria Ceramica, Atlas Concorde places the Made in Italy logo on all the products designed and produced in Italy, that is to say ceramic tiles, decorations and the majority of special trim tiles. Only a small amount of the latter is manufactured in Spain. Atlas Concorde products are produced using eco-friendly technologies, top quality and safe raw materials with the best working conditions guaranteed for our personnel. For these reasons, Atlas Concorde's Made in Italy is the expression of strong values such as style, design, product quality, and respect for the environment and the people who live in it.

The Ceramics of Italy logo is an exclusive identification on ceramic products which have effectively been made in Italy by companies that are a part of the Confindustria Ceramica and who adhered to its Ethical Code. This Code, promoted and created by Confindustria Ceramica, commits all companies to communicate, clearly and with transparency, the origin of their products.
