WE CARE

Harmony of spaces: coordinated furniture and surfaces.

The combination of elegance and functionality.

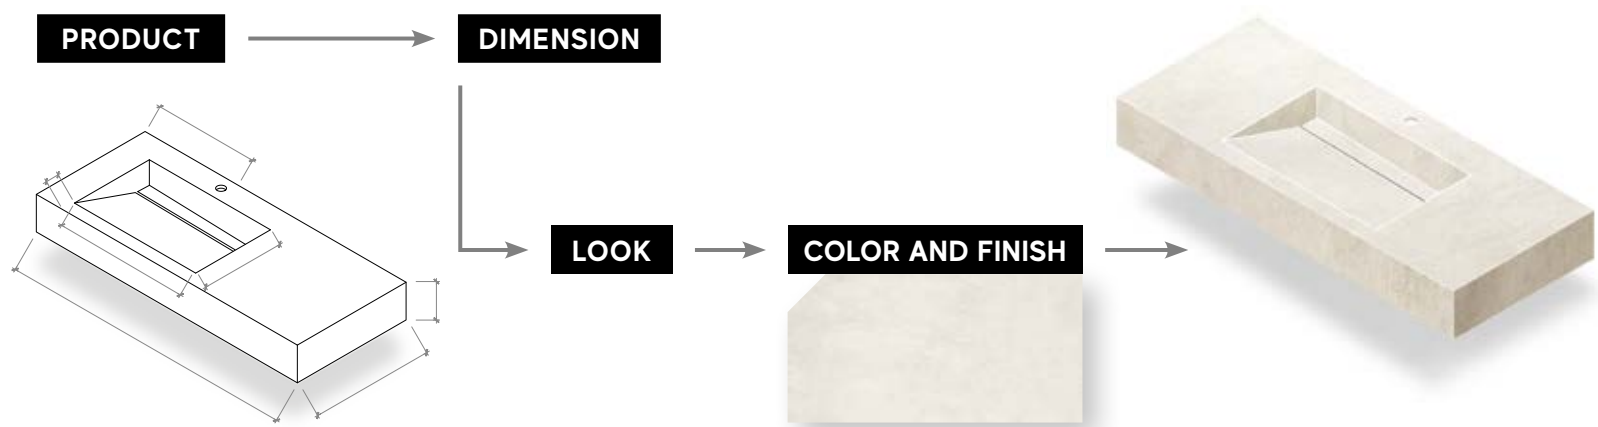

Porcelain sinks and shelves are elements designed down to the smallest detail to create complete bathroom settings in terms of design and aesthetics. These proposals have a high stylistic and performance value and were designed to be matched with Atlas Concorde ceramic surfaces, ensuring a perfect combination of elegance and practicality.

Synthesis of technical performance and versatility.

Thanks to the wide availability of sizes, colors and finishes, the Mastertop element opens the way for the introduction of porcelain tops that combine excellent technical performance with extreme versatility. This offers a furnishing proposal using its refined design and project functionality.

Design solutions: customizable furnishing elements.

The Contract range presents a rich offer designed to support designers and architects in designing and developing bespoke solutions, while at the same time respecting industry standards. The range serves as a perfect tool to support the realization of bathrooms, with a customer-oriented approach and the highest guarantee in terms of sturdiness and reliability.

Porcelain tile values: aesthetics, resistance and hygiene.

In all the sink elements of the Contract line, the availability of the accessible basin makes it possible to combine aesthetics with ease of cleaning. Hygienic and extremely hard-wearing, the basins focus on the unrivalled qualities of porcelain to give resistance and durability to bathroom furnishings.

- 84 CLEANING AND MAINTENANCE

Technical features

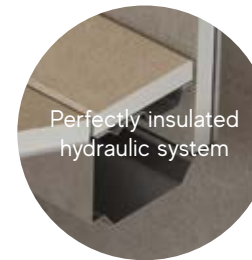

Quality processes and technologies

Quality processes and technologies: the use of the most advanced manufacturing techniques, the best materials and stringent quality testing protocols allow these products to achieve very high aesthetic and functional performance.

Drain access

Drain access: rotating the swinging panel makes it possible to access the basin, allowing any remaining dirt to be easily removed.

Perfectly insulated hydraulic system

Perfectly insulated hydraulic system: the one-piece stainless steel basin prevents water infiltration and ensures perfect hydraulic insulation of the object over time.

High impact resistance

High impact resistance: the composite structure has been designed and tested to ensure high impact resistance.

Great stability

Great stability: the fixing system consisting of specially designed stainless-steel brackets ensures high stability and structural sturdiness.

CLEANING AND MAINTENANCE

WE CARE

Cleaning and maintenance

SANITIZING

Porcelain tiles surfaces are extremely easy to sanitize, owing to the physical and mechanical features of this material. Indeed, since they are produced at extremely high temperatures, they prove entirely poreless, which prevents mold, mildew and bacteria from spreading. This means sanitizing products or products with a specific concentration of chemicals capable of eradicating germs and bacteria from surfaces can easily be used, for optimum efficiency and without worrying about damaging the material itself.

ROUTINE CLEANING

For routine cleaning, simply use a damp sponge or a microfiber cloth with hot water and ordinary neutral detergent* then wipe dry with a soft cloth.

To remove dirt built up in the corners, we recommend you rub with a nonabrasive soft bristle brush. Avoid using:

1. Products with waxing, restoring, polishing, brightening properties;
2. Products containing hydrofluoric acid and its derivatives;
3. Metal wire pads (iron and steel pads) or excessively abrasive pads.

CAUTION: Porcelain tiles do not require the application of waxes or detergents with polishing additives, even when the surface is glossy.

*such as **Clean Universal** made by **Faber Chimica** or **Fila Clean&Shine** for the Italian market - **Fila Brio for all other markets.**

EXTRAORDINARY CLEANING

In the event of tough stains, which cannot be removed during routine cleaning operations, we suggest the use of alkaline detergents* for coffee, fruit juice, wine, ink stains and the like, acidic detergents**

in the event of limescale residue (or rust), use specific detergents to remove silicone sealant residue***

*such as **Clean Degreaser - Deep Degreaser** made by **Faber Chimica** or **Fila Powerclean** for the Italian market - **Fila Hobby** for other markets.

such as **Clean Limescale - Tile Cleaner made by **Faber Chimica** or **Fila Deepclean** for the Italian market - **Fila Via Bagno** for other markets.

***such as **Epoxy Cleaner** made by **Faber Chimica** or **Fila Zerofil.**

STEEL SURFACES

Stainless steel is an extremely strong material and is not subject to the corrosive action of oxidation. However, specific products should be used for cleaning it.

In addition, to avoid damaging the surface, do not use:

1. sponges or scourers that could cause irreversible scratches and abrasions;
2. aggressive chemicals;
3. cleaning products based on ammonia, bleach or chlorine.

Note

CAUTION

Avoid accidental shocks that could result in chipping or irreversible damage. In the event of breakage, check that the structural parts are not damaged and, if necessary, discard the item.

Avoid any improper use of the items and their components. Some removable parts could be used as blunt objects.

Be careful: sharp edges and possible razor-sharp surfaces.

Detailed technical data sheet available

Dimensional tolerances ± 2 mm.

The specifications given, including weights and dimensions, may differ slightly from the actual pieces, due to the inherent tolerance characteristics of the ceramic material and its manufacturing process. The company reserves the right to change technical data sheets and operating characteristics of products at any time without prior notice.

Colors and optical features of the materials illustrated in this catalogue are to be regarded as mere indications.

Porcelain tiles: a safe choice

HYGIENIC

The ideal material for bathroom surfaces: the surfaces are easy to sanitize thanks to its compact nature and chemical-physical stability.

RESISTANT

The superior surface hardness makes it especially resistant to scratches and everyday wear.

EASY TO CLEAN

Waterproof properties teamed with a compact nature make this material resistant to chemicals and therefore easy to clean.

MATCHABLE

The perfect matching with Atlas Concorde surfaces harmonizes every setting.

La perfetta abbinabilità con le superfici Atlas Concorde dona armonia a ogni ambiente.

MADE IN ITALY

The Made in Italy logo stands for style, quality and ethics. Having firmly adhered to the Ethical Code promoted by Confindustria Ceramica, we place the Made in Italy logo on all the products designed and produced in Italy, that is to say ceramic tiles, decorations and the majority of special trim tiles. Only a small amount of the latter is manufactured in Spain. These products are produced using eco-friendly technologies, top quality and safe raw materials with the best working conditions guaranteed for our personnel. For these reasons, Made in Italy is the expression of strong values such as style, design, product quality, and respect for the environment and the people who live in it.

Ceramics of Italy

The Ceramics of Italy logo is an exclusive identification on ceramic products which have effectively been made in Italy by companies that are a part of the Confindustria Ceramica and who adhered to its Ethical Code. This Code, promoted and created by Confindustria Ceramica, commits all companies to communicate, clearly and with transparency, the origin of their products.
