

# Norde

**General:** As the name may suggest, this series of porcelain stoneware tiles & pavers are created to emulate the ancient glacier granites of Norway. Like the original, their appearance, surface structure and non-staining properties will stand the test of time, all while being manufactured to be ecological and sustainable. Produced for natural internal and external uses, including 3 decors and crazy pave options + 20mm thick paving options in P4 slip resistance.

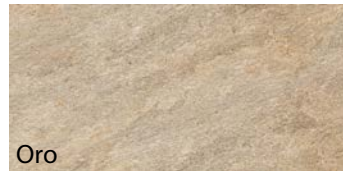

**Applications:** Commercial & residential in & out doors, including foyers, boutiques, galleries, living areas, balconies, patios, kitchens, bathrooms, floors, walls and step treads (with lamination and various edge detail finishes being achieved).
