

Advance

General: Advance combines in a single refined appearance different textures deriving from several natural stones. On the typical texture of slate, sharper marble filigrees and granular inclusions typical of limestones are grafted. The result is a stone-effect porcelain tile collection modelled on contemporary sensibility: a harmony that goes beyond taste and aesthetics, and comes to imagine concrete spaces where you can experience the admirable combination of beauty and quality.

Applications: Advance is designed to accompany modern life in all of its activities and settings: from public and high-traffic work spaces to prestigious, residential, and luxurious environments - both indoors and out.

Origin: Italy

Colours: Chalk
Greige
Silver
Graphite
