

Terrazzo

General: Terrazzo - the Italian word for “terrace”, is making a comeback in interior design. Terrazzo is a porcelain tile suitable for both indoor and outdoor applications, available in 11.5mm and a matching 20mm paver for external areas. Our Terrazzo range can be used in demanding environments and is quiet lovely for internal spaces. This material is usually made from a poured pre cast cementitious porcelain binder with chips of marble, quartz, granite and glaze.

Applications: Commercial & residential in and out doors, including foyers, shopping centres, public areas, courtyards, living areas, patios, walls inside & out, step treads and pool surrounds, (with lamination and various edge detail finishes being achieved)
